Defining Industry Standards One Customer At A Time!

Standard Mortar Features:

- Repairs concrete floors damaged by heavy traffic, chemicals, wash downs, etc.
- Excellent trowel ability - *easy to install.*
- Odorless and fumeless - *can be used indoors or outdoors.*
- Fast turn-a-round - *cures in 4 hours for foot traffic & 6 hours for heavy traffic at 70°.*
- Stands up to heavy traffic and chemicals, and will take heat up to 250°. - *13 different sizes of aggregate make Standard Mortar very dense. Even at 1/4 inch thickness. Standard Mortar takes very high impact. While curing the resin actually becomes part of the concrete.*
- All components (part A - Epoxy, Part B - Hardener, Part C - Aggregate) are pre-measured in each 40 lb. unit. *Your in-plant maintenance personnel will get great results every time.*
- Has a non-skid finish - *can also broadcast aluminum oxide into material (30 grit) for additional non-slip finish.*
- Will work in expansion joints, and is able to take a feathered edge in repair areas.
- No shrinkage.
